**RESPONSE TO OFFICE ACTION**

Sir:

In response to the Office Action dated October 2, 2002, please amend the above-identified patent application as follows:

**In the Claims:**

Please amend claims 1, 10, 23, 34, 37, 41 and 43 as follows:

1. (Amended) An ophthalmic formulation, comprising:

a1  
a first active compound including an alpha 1 antagonist capable of reducing dilation of a human eye exposed to a low light environment as compared to dilation which naturally occurs absent the compound and generating a redness response of about +1 or less on a scale of 0 to +4.

10. (Amended) A method of modulating pupil dilation, comprising:

a2  
administering to an eye of a patient a formulation comprising a first compound including an alpha 1 antagonist capable of disrupting an endogenous compound which stimulates a dilator muscle of the eye; and

allowing the formulation to remain in contact with the eye for a period of time and under lighting conditions where the dilator muscles would be stimulated in the absence of the formulation;
